# Rollei **eGimbal G1**

www.rollei.com

Rollei since 1920

**Innovation: Regardless of whether full in action or doing calm panning shots within nature – the new Rollei eGimbal G1 balances all involuntary movements and camera shakes in its function as 2D hand controlled gimbal!**

- Light and small electronic stabilizer – just perfect to film out of hand
- Easy to mount on sport helmets and Rollei Mogopod 1
- 45 degrees handle – adjustable angle via handle
- Receiving area-tilt angle of max. 110° and down of max. 45° upwards
- Easy to calibrate
- Original GoPro battery necessary*
- Works for GoPro* cameras (Hero 3 and 3+) and their relevant components

IFOOTAGE™ exclusively made for Rollei

24 Months Warranty and Replacement

## Top Details

- Combines the techniques of a brushless gimbal *(brushless motors feature a wide speed control range and high speed stability. They are compact, powerful and energy-saving and give the model the correct power. Except for the bearing, they are virtually maintenance-free)*
- Automatic balancing rotation angle +/– 125 °
- In 3 seconds ready and in no time in position
